FIFA 14

INTRODUCTION

FIFA 14 is a football simulation computer game in which two teams battle their way with their football skills to fetch the back of the nets.

GENERAL INSTRUCTIONS

1. From the list of provided names, random selection of two competing players would be done. A selected pair is required to play 3 matches against each other, and the player winning most matches will advance for further rounds.
2. For ease of use all games will be played in “Friendly” mode. After the game is finished, the computers will be guided back to the Home Screen and a new 'Friendly’ will be selected.
3. Every player is allowed to pick their preferred team (both club as well as international team). Teams can be picked before the start of the game. Players are allowed to use multiple teams throughout the tournament as they please. It is accepted to have the same teams play against each other (e.g. Barcelona). In that case, the 'away' player will have to pick the Away Jersey for that team. In general, 'away' players are responsible for picking the jersey that does not resemble the home team jersey.
4. All games have a length of 2x5 minutes. There is no more than 45 seconds for setting the starting line up and the half time changes (45 seconds for each).
5. Players are only allowed to pause the game if their team is in possession of the ball and no more than 2x per half.
6. Players are required to check in no less than 20 minutes before the start of their first game.
7. Players can play with a keyboard or a gamepad, whatever suits their needs and the same would be provided to them by us.

JUDGING CRITERIA

1. The player winning most matches will advance for further rounds.
2. There will be no extra time or penalty shootout in case of a draw. If no winner surfaces from the 3 matches then the winner would be decided by their aggregate scores (Total goals scored in all matches). If the aggregate scores also results in a draw. Then penalty shootouts will decide the fate of the players.
