Introduction:

Welcome Folks!

"KNIT Sultanpur" brings you a feast of development to explore the artist in you, and to give wings to the 'coder and geek' residing in you. "HACKATHON", is the only event of it's type which will engage you to code for continuosly for "24 Hours". Yes you heard it right !

The goal of this digital programming competition is to harness the creativity of all the young minds taking part in this enthralling adventure.

You have to develop product based on a theme given in "CHALLENGES" section.

Event Structure:

Goal: There is no restriction to use any language, technology stack, or libraries.

1.) Web Application

2.) Android Application

3.) Desktop Application

You have to submit a working model. If you use any database like MySQL or PostgresSQL you willsubmit the database dump/filesalong with your submission. However you are not allowed to submit just the prototype.

Feel free to code and build, no previous experience in particular is needed, but your research over the topic and creativity will be appreciated and will play special role in judging your product.

"No automated tools are allowed"

Learn: "Opportunities and dedication travel in tow"

The rejuvinating plethora of the coding is not only a platform to learn but also to explore.This is not hardcore job. Plenty of time to innovate, enjoy with coffee and meet amazing people. Discuss about the new technologies and learn too.

Challenges:

Themes to work upon will be announced two days before the HACKATHON

Judging Criteria:

a.)Precision-

How accurately your product solve the challenge problem, is it really valuable and efficient, or just a hoax.Always remember even a genuine try by your side is appreeciable.

b.)Creativity-

Is the artist in you yet alive , can you present the solution to the problem in a spellbinding way.
Welcome then !
Have coffee with us.

c.)Design-

How well the front-end developed,the magic you do with UX and UI,the potential you will unleash of the back-end of the product etc. will all decide who will win the race.

Rules:

Teams of up to 5 are allowed. Each team is solely responsible for its own cooperation and teamwork. The Sponsor will not officiate any dispute between members regarding their conduct, participation, cooperation, contribution, prize sharing or intellectual property ownership.

A team member will have to give a small presentation to explain their product.

All projects/code base will be submitted via git.
